

scheda tecnica ROBBEN

MALVOLTI & GILGIN

Questo divano è interamente realizzato a mano in ogni fase di lavorazione rappresentando la massima espressione dell'artigianato brianzolo. E' possibile comporlo su misura cliente oltre alle misure proposte in questa scheda tecnica rappresentativa.

Inoltre il suo comfort è personalizzabile modificando la sua profondità oppure usando differenti tipologie di imbottiture con varie densità di rigidità.

E' consentito anche modificare alcuni dettagli come i piedini o l'altezza della seduta/schienale

Struttura telaio in legno massello rinforzato, garanzia sulla struttura 10 anni.

Molleggio con cinghie di cuoio e caucci INTES[®] tirate e fissate a mano.

I cuscini schienali sono in una miscela costituita da 67% di Piuma d'Oca Vergine e 33% Rollo Fill,[®] una fibra poliestere cava siliconata che non fa perdere di consistenza al cuscino in quanto la piuma si annida nei suoi alveoli creando massa.

Il cuscino sedile è composto da un massello H8>H11 cm in Poliuretano espanso ad alta densità, un materiale tecnico performante indeformabile con una durata eccezionale.

Questo sedile in Poliuretano viene poi avvolto da un materassino trapuntato di morbida Piuma d'oca. La piuma viene convogliata in scompartimenti separati in modo da garantirne una distribuzione equa, evitando ammassamenti non uniformi.

In alternativa i cuscini sedili possono essere realizzati anche interamente in Poliuretano espanso indeformabile senza piuma con varie densità di rigidità personalizzabili a piacere.

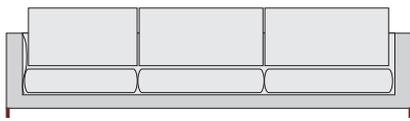

La qualità di tutti i nostri cuscini (sedili-schienali) viene autenticata con un sigillo di garanzia cucito sulla fodera contenitiva.

Questo sigillo "Made in Italy" descrive in modo dettagliato il materiale che viene utilizzato, il produttore e la conformità alle normative e decreti ministeriali in vigore.
